SUMMARY

Full Stack Software Engineer .NET with 4 years of experience designing and developing modern, scalable web applications and backend services. Proficient in the .NET / .NET Core stack, ASP.Net MVC, and frontend frameworks including React, TypeScript, and JavaScript. Experienced in building responsive, user-friendly applications, designing and optimizing database schemas with MS SQL Server and PostgreSQL, and implementing CI/CD pipelines using Azure DevOps (ADO) and GitHub. Adept at troubleshooting, debugging, and resolving post-production issues to ensure high performance and reliability.

TECHNICAL SKILLS

Programming Languages: Java, Python, C#, C, C++, SQL, SQL(MSSQL, Postgresql, MongoDB), TypeScript
Frameworks/Libraries: .NET Core, WPF, VB .net, MVC ASP.NET, ReactJS, AngularJS, Tailwind CSS
Web Technologies: HTML, CSS3, JavaScript (ES6+), REST APIs, JSON, XML
Testing & CI/CD: Selenium, Bruno, Postman, Blazemeter, xUnit, GitHub Actions, GitLab CI, Jenkins
Cloud Platforms: AWS (ECS, S3, API Gateway, Lambda, RDS/Aurora, DynamoDB, S3, CloudFront, ElastiCache, SNS/SQS), Azure
DevOps Tools: Docker, CVS, SVN, Kubernetes, Maven, Terraform, Jira, Git, Splunk, RabbitMQ, Kafka
Development Practices: Agile, Scrum, TDD, BDD, Clean Architecture, Code Reviews

PROFESSIONAL EXPERIENCE

Software Development Engineer | ***Boeing, USA*** ***January 2025 – Present***

- Engaged with 15+ business stakeholders and project leads to define critical project requirements, resulting in a streamlined process that decreased project delivery timelines by 20%, enhancing team productivity and stakeholder satisfaction.
- Initiated a tailored customer interaction component within the **CRM platform**, improving customer engagement by 20% through a better user experience and optimized data workflows.
- Implemented enterprise applications using **C#, ASP.NET, and RESTful Web APIs**, ensuring high performance, scalability, and secure data access.
- Demonstrated expertise in implementing **GraphQL & Restful Api** and refactoring legacy code in key products, reducing server requests by 30%, user-reported bugs by 30%, and improving code maintainability by 25%.
- Built scalable and performant backend applications using **React.js and JavaScript**, implementing server-side rendering (SSR) and API routes to enhance user experience and SEO.

Full Stack Developer | ***Information Data Systems, USA*** ***January 2024 – December 2024***

- Revamped existing user interfaces utilizing **Angular and JavaScript**, ensuring adherence to performance optimization best practices,reduced bouce rate to 15%, contributing to overall improved user experience across the application.
- Accelerated the migration of legacy monolithic applications to **microservices architecture**, utilizing Docker for containerization and **Kubernetes** for orchestration, resulting in a 40% reduction in deployment times and improved scalability.
- Coordinated efforts with **UI/UX** designers to create prototypes and wireframes for six web applications; the resulting user feedback sessions involved 200+ participants, providing actionable insights for ongoing product improvements.
- Enhanced application performance through code refactoring, caching, and performance profiling, resulting in a 55% improvement in load times.
- Designed and executed training sessions for 15+ team members, fostering a culture of collaboration and iterative improvement, the initiative enhanced team engagement and productivity across the **software Development lifecycle.**

Software Engineer | ***HCL Technologies*** ***June 2021 – December 2022***

- Orchestrated CI/CD pipeline automation using **Jenkins, Maven, and GitHub Actions**, reducing release cycle time by 40%.
- Optimized backend architecture with **C# and .NET** to ensure reliable banking transactions for 20K+ users.
- Spearheaded the deployment of highly resilient serverless cloud infrastructure leveraging **AWS Lambda, Amazon EC2, and Amazon RDS**, ensuring 99.8% system uptime and robust scalability.
- Pioneered micro services initiatives within **Agile** delivery cycles, enabling rapid feature releases and elevating system responsiveness by 90%.
- Maintained full-stack apps on **Linux/UNIX** systems for 10,000+ users, achieving 99.9% uptime and 30% performance gain.
- Streamlined data retrieval processes by integrating relational databases such as T-SQL and NoSQL database like MongoDB, achieving a 30% improvement in query performance through advanced tuning techniques.

EDUCATION

University of Louisiana at Lafayette, USA — MS in Computer Science | **CGPA-3.7/4.0**
Jawaharlal Nehru Technological University — B.Tech in Computer Science | **CGPA-3.6/4.0**

CERTIFICATIONS

- AZ-204: Microsoft Azure Developer Associate
- AZ-900: Microsoft Azure Fundamentals
- AWS Certified Cloud Practitioner
