SUMMARY

Full Stack Developer with 3.5+ years of experience designing, building, and maintaining production web applications using **React, Python (FastAPI, Flask), and REST APIs** that translate **Power BI dashboards** and enterprise data into user-friendly, **data-driven web-based solutions**. Skilled at building responsive frontends over relational and NoSQL data sources, integrating with **ETL/data pipelines**, and collaborating with data analysts, BI developers, and business stakeholders to deliver scalable, decision-ready applications. Strong problem-solving, debugging, and analytical skills with a focus on **clean, well-tested code**, technical documentation, and **UI/UX** for data-intensive interfaces.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, C#, C/C++
Frontend & UI: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI, Data-Intensive Interfaces, Power BI
Backend & APIs: FastAPI, Flask, REST APIs, External API Integration, Microservices
Databases: PostgreSQL, Azure SQL, MongoDB, Elasticsearch, Structured & Unstructured Data
Data Pipelines & ETL: AWS Glue, Amazon Redshift, S3, Athena, PySpark, Azure Databricks
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Terraform, Git, Azure DevOps, GitHub Actions, CI/CD
Integration & Practices: LLM/RAG Integration, Hugging Face, Full SDLC, Application Architecture, Clean Code, Testing, Debugging, Documentation, Code Reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer | Boeing, USA

January 2025 – Present

- Designed, built, and maintained **full-stack web applications** using **Python (FastAPI, Flask) and React**, translating **Power BI dashboards** and stakeholder requirements into modern, actionable web-based solutions integrated with enterprise data sources, reducing manual operations by 40%.
- Developed **backend APIs and React-based frontend interfaces** powering production deployments, owning features end-to-end from design through deployment with scalable architecture, low-latency data access, and clean frontend-backend integration patterns.
- Wrote **clean, well-tested code** following best practices, achieving 80%+ code coverage through evaluation pipelines, A/B testing, and behavioral testing to ensure accuracy, reliability, and continuous improvement of user-facing applications.
- Troubleshoot and debugged production issues across full-stack systems, tuning latency, performance, and cost efficiency to maintain production-grade reliability and usable, responsive interfaces.

Software Engineer | Information Data Systems, USA

January 2024 – December 2024

- Developed **full-stack applications using Python and React**, integrating data and AI capabilities into **data-driven workflows** that improved decision-making accuracy by 22% for downstream business users.
- Engineered **scalable data pipelines using PySpark and Azure Databricks**, processing structured and unstructured datasets to support web application functionality and analytical insights across business consumers.
- Built data processing pipelines for unstructured text using Python, TensorFlow, and Hugging Face, achieving 93% extraction accuracy and enabling **structured insights** from raw data sources for downstream applications.
- Implemented deep learning models in PyTorch for **time-series analysis on sensor data**, improving prediction accuracy and enabling downstream production use cases.
- Automated **CI/CD workflows** using Docker and GitHub Actions, reducing release cycles by 30% and enabling reliable, repeatable deployment of production web applications.

Software Engineer | HCL Technologies

January 2022 – December 2022

- Built **ETL pipelines using AWS Glue**, transforming and integrating data from multiple sources into **data warehouses (Redshift, S3, Athena)** for business analytics and reporting use cases.
- Developed and deployed **Python-based applications** integrated into production systems, supporting scalable backend services and downstream business workflows on relational and analytical data stores.
- Built **CI/CD pipelines** using Docker, Kubernetes, and GitHub Actions with **Git and Azure DevOps**, automating deployment and monitoring of production applications across environments.
- Implemented **monitoring and observability** solutions using MLflow and Azure tools, improving visibility into latency, error rates, and performance metrics across production systems.

EDUCATION

University of Louisiana at Lafayette, USA
Jawaharlal Nehru Technological University

MS in Computer Science | **CGPA: 3.7/4.0**
B.Tech in Computer Science | **CGPA: 3.6/4.0**

CERTIFICATIONS

- AZ-204: Microsoft Azure Developer Associate
- AZ-900: Microsoft Azure Fundamentals
- AWS Certified Cloud Practitioner
